

Ponizio PE78EI

EI15, EI30, EI45, EI60, EI90, EI120

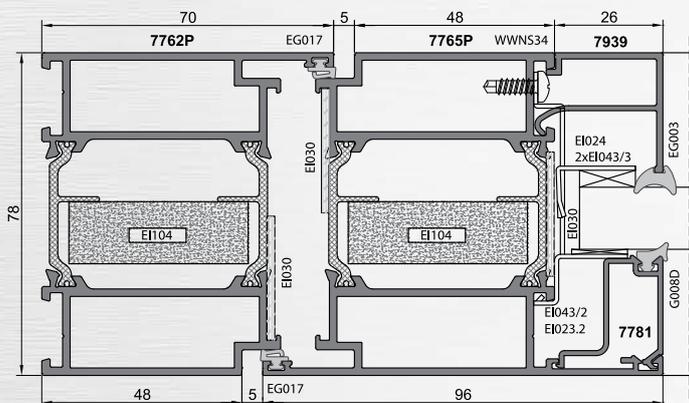

An insulated profile system designed for the construction of internal and external fire-resistant joinery.

- profiles with special fire-resistant inserts, selection depending on the fire resistance class of the joinery: EI15, EI30, EI45, EI60, EI90, EI120
- single and double, inward and outward opening doors with several different threshold and leaf solutions (class EI15-EI90) as well as partitions up to 4000 mm high available
- 35 and 46 mm thermal breaks ensuring good thermal insulation
- easy hardware and accessories installation shortens construction time
- large-dimension constructions available
- Design Line system variant (glazing with beads on only one side)
 - glazing and profiles form a nearly flush surface
 - decreased production and assembly time compared to systems with glazing beads on both sides
- interconnected with other Ponizio systems
- smoke control doors available
- arched constructions available
- internal and external doors for emergency exits and routes available
- class RC2, RC2N, RC3 burglary resistant doors available
- three types of fire-resistant inserts: gypsum, aluminosilicate and poured
