

Ponizio BL18

LIGHT BALCONY ENCLOSURES

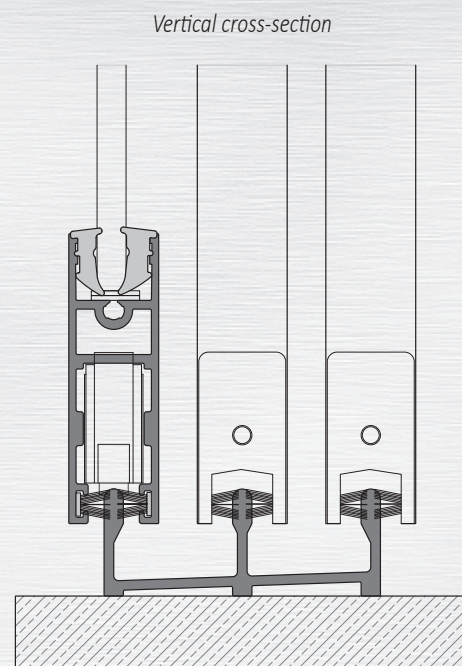

The sliding segment balcony enclosure system is designed for the construction of light, transparent weather covers. It offers protection against gusts of wind and driving rain while allowing proper ventilation.

- › 3, 4, 5 rail sliding system
- › bottom rail installed on parapet guardrails or walls, top rail mounted to the ceiling slab
- › segments sliding both ways, each on its own rail
- › enclosure secured against opening due to e.g. wind
- › easy segment installation
